

Government Sales

Doosan Infracore
Portable Power

The Portable Power Experts

- Compressors
- Generators
- Mobile Security
- Lighting Systems

Doosan Portable Power has been supplying our Military and Federal Agencies with rugged, specialized compressors, generators and lighting products for over 135 years. Our dedicated, government sales and support team understands the needs of the Government customer and we have the ability to quickly supply not only equipment but answers. Our worldwide distributor network, backed by factory specialists, is able to provide the expert local service and support deserved by the men and women who defend our country.

We are the worldwide leader in providing compact, customized portable power products. Our equipment is engineered using the latest CAD systems and design tested in our state of the art testing facility. Each unit is quality inspected prior to departure from the factory which is ISO 9001 certified. Because of our years of experience in the industry we can customize a solution tailored to your unique application based on our commercial offering which is the most varied and in-depth line up in the industry. Our 96 acre, 512,000 square foot worldwide headquarters is located in Statesville, NC. During peak production we employ over 400 local men and women. Statesville is the center for all aftermarket field support, manufacturing, testing, engineering and warehousing for Doosan Portable Power.

Contract Information

As a vendor to the United States Government, Doosan Infracore Portable Power holds several contracts for the procurement of our equipment by any branch of the Federal Government. We can take orders by PO or by Government Commercial Purchase Cards (GCPC) directly or through any of the Federal contracts listed.
