What are you looking for in a compressor?

Some companies would have you believe that all compressors are alike, that if they provide steady air at the desired psi, one's as good as the other.

They'd also like you to believe that price should be your primary concern in the buying decision.

But according to an independent market study in June 2005, 40 percent of all compressor users prefer Ingersoll Rand air compressors over other brands.

Now, knowing there are less expensive compressors on the market, why do so many contractors choose Ingersoll Rand?

It's not just the product, it's the company

The purchase price of a compressor includes more than air. It includes a company's commitment to exceeding your needs, before, during, and after the sale. Without that commitment, where's the value?

Can you put a price on trust? Ingersoll Rand has a reputation for outstanding service after the sale, with aftermarket support designed to keep you up and running.

Ingersoll Rand offers same-day shipping on 97 percent of all parts orders, and maintains a 97 percent off-the-shelf fill rate for replacement parts on models dating back to 1970. In addition, we offer standard and extended warranties to help protect your investment.

We also believe in rewarding your loyalty by making it as easy as possible to purchase the Ingersoll Rand equipment you need. Ingersoll Rand Financial Services offers both traditional installment loans and leasing, with such advantages as competitive rates, flexible programs, and 100 percent financing.

Because Ingersoll Rand compressors cost less money in the long run

Quite simply, that's what makes them the best value.

To maximize the efficiency and life of your compressor, use only genuine Ingersoll Rand parts.

Ingersoll Rand compressors are built better, so they stay on the job longer. And because we've designed them with easy access, you can perform maintenance and service with little downtime. In fact, based on published schedules for the leading 185-cfm compressors, users can save more than 20 percent on routine maintenance costs with Ingersoll Rand.

What's more, the resale value of Ingersoll Rand compressors is 20 percent higher than competitive brands. No other compressor retains its value longer.
