

Airend Exchange | Program

Portable Power

Airend Exchange Program advantages

Whether you own a Doosan portable air compressor or an OEM drill that has a Doosan airend built in, a remanufactured airend provided through our Airend Exchange Program will deliver superior performance and reliability which means profits for you and your company. Doosan factory remanufactured airends are carefully disassembled and inspected to ensure that any damaged or obsolete parts are replaced. Each airend is rebuilt by an experienced craftsman at Doosan Portable Power's worldwide headquarters.

Airend assembly

The very latest technology is incorporated into all our remanufactured airends, so when there is an update available, you can be sure that an airend purchased through Doosan's Airend Exchange Program will reflect all available upgrades.

Parts compatibility

Only genuine Doosan parts are used in our factory remanufactured airends which ensures complete parts compatibility as well as the performance and reliability you demand. Doosan Portable Power can also adapt new or rebuilt airend packages for any OEM drill, compressor or your unique application.

Airend availability

We recognize that your time is valuable. We have the largest stock of airends in the industry to ensure you the quickest possible delivery. We ship worldwide and we can air freight if needed. After-hours service is also available, including weekends.

Extended warranty option

We offer a standard two-year, 4,000-hour warranty that can be extended to a five-year, 10,000-hour warranty by using our specially formulated airend lubricant, genuine Doosan filters and separator elements at the proper change intervals. Genuine Doosan compressor oil is the only fluid certified and proven to extend the life of your airend due to its special formulation and anti-foaming properties.

Customer service

At Doosan Portable Power we are proud of the airend rebuild services we provide. When you purchase a Doosan factory remanufactured airend there is no worry or risk involved, because you are backed by a worldwide network of distributors dedicated to quality and exceptional customer service.

Doosan advantages

Availability, reliability, experience, performance and **technological upgrades** are the main reasons customers prefer the Doosan Airend Exchange Program.

For more information, contact your nearest Doosan Portable Power distributor or call the factory at 800.633.5206 if you have an airend you are considering rebuilding.
*Please provide your airend serial number.

Airend exchange advantages

- Minimal downtime (most airends are stocked for fast delivery)
- All exchange airends incorporate the latest technology ensuring maximum performance and reliability, plus increased resale value
- Two-year standard warranty with the option of a five year warranty
- All exchange airends are built to strict quality standards
- Most experienced technicians in the industry - our technicians have an average of 32 years experience
- Only genuine Doosan parts are used during remanufacturing, meaning there is no concern about improper fit or incorrect bearing load capacity
